A photograph of a classroom during a lesson. A male teacher in a light pink shirt stands at the front, gesturing towards a large projector screen. The screen displays text about a mixture of flour and water. The classroom is filled with students sitting at desks, viewed from behind. A blackboard is visible behind the teacher.

Result: The mixture of flour and water looked cloudy. Tiny particles of flour could be seen floating in the water. The glass of water had no effect on the light rays, they passed through the water unchanged.
