

ESG ANNUAL REPORT

APRIL 2016 - MARCH 2017

ESG Annual Report: 2016-17

Summary

About Exciting Science Group:

The Exciting Science Group comprises of scientists from two of Pune's best research institutions, NCL and IISER-Pune. This initiative is aimed at conveying the excitement of science and technology to school students. The motivation behind our programme is to attract the brightest talent from the next generation towards careers in science and technology, since it will be these students who will drive tomorrow's science and innovation based economy.

Popular Talks: Held once a month (on the last Sunday) these talks give students a chance to meet scientists and understand the relevance of their work to society. Typically, these talks are filled with live demonstrations and experiments conducted by scientists – so as to kindle a sense of wonderment in the students. We have completed 12 Talks until Jan 2017. The last talk for this year is scheduled in March 2017. More than **1200 students** from city-based schools across Pune participated in the talks this year.

Summer/Winter Workshops:

2 Three Day Workshops on "Assessing Environmental Change Using Satellite Data" using GRASS Geographic Information Systems (GIS) software were held in May 2016 and Nov 2016 for students between the ages of 12-14 years to introduce the tools and techniques to assess environmental changes using remotely sensed data from satellites. **40 students from 25 schools** participated in the workshop, including 10 students from 3 PMC schools.

1 Five Day Workshop on "Having Fun with Scratch Programming" targeted at children between the ages 8 – 10 were conducted in May 2016. The workshop was intended to introduce kids to the fundamentals of Scratch, a graphical programming interface developed by the Media Lab – MIT. **29 students from 27 schools** participated in the workshop, including 5 students from 3 PMC schools.

1 Three Day Workshop on "Raspberry Pi" was conducted in May 2016 for PMC students from grade 7 and 8. The workshop aimed to introduce coding on Raspberry Pi, a credit card size computer originally developed for learning basic computer science. It is versatile and useful platform for learning different domains of STEM [Science, Technology, Engineering, & Maths] education. **26 students from 3 PMC schools** participated in the workshop.

1 Half-Day Workshop on "Science Club Training" was organized by ESG in collaboration with GREAT Foundation to take the idea of the science club programme that we have developed over the years and provide training for this to be replicated by teachers in schools. **12 Teachers from 9 PMC schools and 36 corporate volunteers** participated in the workshop.

3 PMC students also participated in a weekly "**Math gaming workshop**" organized by Tinkering lab at Venture Center between April-June 2016. This workshop aimed at improving logical, analytical and strategic thinking in children by playing games that use mathematical principles and strategies.

2 Preparatory Workshops and 1 Mentoring Session for Research-based projects were organized in Nov 2016 and Feb 2017 respectively in order to guide students currently enrolled in Class 8 and 9 to submit a research-based project in the ESG Science Fair 2016-17. **202 students from 37 schools** participated in these preparatory workshops. However, this year, we received only

very few entries to the ESG Science Fair. Therefore, we were unable to conduct the science fair and instead organized a mentoring session for all the participants who submitted entries for the fair. 14 students from 8 schools participated in the event. A few of these entries have been selected for more intensive one-on-one mentoring by NCL/IISER scientists. This session is scheduled to be held in April 2017.

Summer Internship Programme: This is a programme of the Exciting Science Group, to get a few students from Pune Municipal Corporation schools to spend a summer in NCL/IISER labs. The internship provided an opportunity for students to work with mentor scientists and PhD students and experience what it means to work in a research laboratory. The internship lasted for two months with the students spending the entire working week at the labs.

Talks at PMC magnet schools: Scientists (from NCL and IISER-P) visit three schools once a month between August to March, and deliver a talk (typically on topics from school textbooks), conduct experiments, and interact with the kids: K.C.Thackeray Vidyaniketan, Near Daruwala Pul; Hutatma Balvir Shirishkumar Vidyalaya, opposite Police lines, and Dr Vasantdada Patil Vidyaniketan, Shukrawar Peth. At the end of the talks, students are given small gift (such as a book, or a science kit that we specially put together) that typically relates to the topic discussed. The students are also provided a snack at the end of the talk. **More than 100 students** have participated in the school talks this year.

Science Club Programme: From the last four years, we have also extended our activities by initiating a weekly "Science Club" programme at two underprivileged schools (K.C.Thackeray Vidyaniketan and Hutatma Balveer Shirishkumar Vidyalaya). From the year 2015, we have expanded the science club activity at Dr Vasantdada Patil PMC Vidyaniketan, Shukrawar Peth. ESG volunteers conduct weekly science club sessions at the three PMC VidyaNiketan schools. The science clubs sessions this year began from August. **More than 100 students** have participated in the science club programme this year.

Competitions:

Science and Art: The second edition of the Science and Art Competition was organized in 2016 in two phases. The first phase was organized in June for PMC school students of class 8 and 9 to motivate them to understand the correlation between science and art. **102 students from 8 PMC schools** participated in the competition. The second phase was organized in July for city based schools. **160 students from 40 schools** across the city participated in this competition.

Kutuhhal 2017 Science Quiz Competition: ESG organized the second edition of "Kutuhhal" – a Science Quiz Competition for school students of grades 8 and 9 in January 2017 at IISER-Pune. The competition was open to schools in and around Pune. The objective of the competition was to improve the learning of science concepts among students, broaden their knowledge, and enhance their strategic thinking ability. A preliminary round was conducted to select four teams for the finals. **More than 135 teams viz. 270 students from 24 schools** including 3 PMC Vidyaniketans participated in the competition.

Research Idea Competition: ESG organized a Research Idea Competition for PMC schools in March 2017 as a culmination of the science club programme. **26 students viz. 13 teams from the 3 PMC schools** participated in the competition and presented their research ideas to judges from CSIR-NCL at the event which was held at the Venture Center.

Social Impact Assessment Programme: Our programmes have been very enthusiastically received by the students, teachers and schools. Our events are all over-subscribed and we typically receive very positive feedback for all our programmes. However, a significant challenge for us over the years has been to evolve metrics to assess the impact of our programmes. Currently, measurement of our impact is based on feedback from participant students, teachers, parents, and researchers, in our programmes. We anticipate that our impacts will be longer term, for example, our efforts will excite some children to choose careers in science, while others may grow up to cheer and support the progress of science.

This year we have actively been able to pursue the formal assessment of our programme. The scientists who volunteer with ESG are some of the top scientists in the country and we place a very high premium on their time. We also receive support from several organizations, and we would like to make sure that all these efforts and time are resulting in something worthwhile. We are currently coordinating with a social worker external to ESG to develop and implement tools to assess the impact of our programmes.

We would like to acknowledge the generous support for this activity from CSIR-NCL, IISER-Pune, the Venture Center, the Forbes Marshall Foundation, the Persistent Foundation, the Praj Foundation, and the Nag Foundation.

PERSISTENT FOUNDATION

Popular Talks

What: This series of once-a-month talks aims to connect school students to practicing scientists. Thus, school students get to hear a firsthand account of what it means to do research, and to get a feel for the thrill of discovery. The speakers do not attempt to teach science to the students – rather, the idea is to create a sense of “wow” and to kindle the students’ curiosity. The talks are not meant to be pedantic lectures, but combine live demonstrations, experiments and problem solving exercises to involve the students and engage their attention.

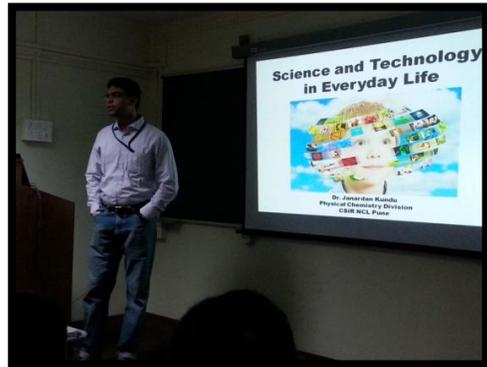

When & Where: The Popular Talks are held once a month at 10 am on Sunday mornings at the NCL Innovation Park, Pashan. The talks are free and open to students and science teachers. Registration is on a first-come-first-served basis, and is done by sending email to register@excitingscience.org or through our web site: <http://www.excitingscience.org>.

| Date | Speaker | What was the talk about? | No of participants |
|---------------|--|--|--------------------|
| 24 April 2016 | Dr Rajnish Kumar | “Getting Familiar with Gas Hydrates” | 55 |
| 29 May 2016 | Dr Sayan Bagchi | “Atoms, Molecules and Light” | 74 |
| 19 June 2016 | Dr Janardan Kundu | “ Science and Technology in Everyday Life” | 125 |
| 16 July 2016 | Dr Sayam Gupta | “The Art and Science of Color” | 180 |
| 28 Aug 2016 | Prof Chandrasheel Bhagwat | “Fun with Numbers” | 130 |
| 25 Sept 2016 | Prof Saurabh Dube | “The Smallest pieces of our universe” | 90 |
| 23 Oct 2016 | Prof Shyam Rai | “How Earth’s Climate is linked to its internal working?” | 65 |
| 20 Nov 2016 | Dr Kavita Joshi | “Small is Beautiful” | 90 |
| 11 Dec 2016 | Dr Anuya Nisal, Dr Kadivaran, Dr Premnath and Shri Pramod Radkar | “ Science and Technology of Currency Manufacturing” | 160 |
| 18 Dec 2016 | Dr Arun Banpurkar and Dr Guruswamy | “Surface Tension and Wetting” | 80 |
| 7 Jan 2017 | Prof Julia Kornfield | “A Short Talk on Long Molecules” | 270 |
| 29 Jan 2017 | Dr BLV Prasad | “Chemistry of Surfaces” | 110 |
| 19 Mar 2017 | Prof Harinath Chakrapani | “The many facets of oxygen in life” | 95 |

Photographs from the talks:

Talk on “Getting Familiar with Gas Hydrates” by Dr Rajnish Kumar, CSIR-NCL, Pune

Talk on “Atoms, Molecules and Light” by Dr Sayan Bagchi, CSIR-NCL, Pune

Talk on “The Art and Science of Color” by Dr Sayam Sengupta, CSIR-NCL, Pune

Talk on “Fun with Numbers” by Prof Chandrasheel Bhagwat, IISER-Pune

Talk on “The smallest pieces of Our Universe” by Prof Sourabh Dube , IISER-Pune

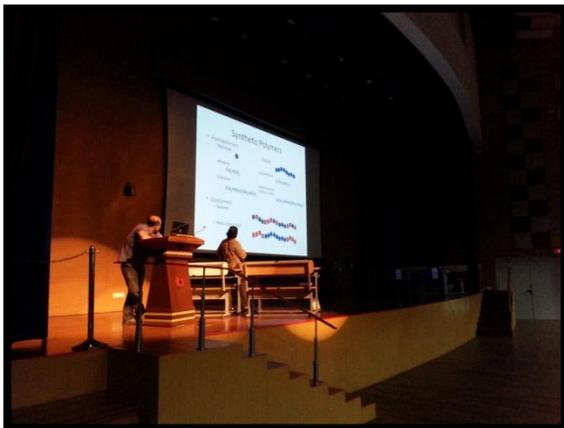

Talk on “How Earth’s Climate is linked to its internal working” by Prof Shyam Rai, IISER, Pune

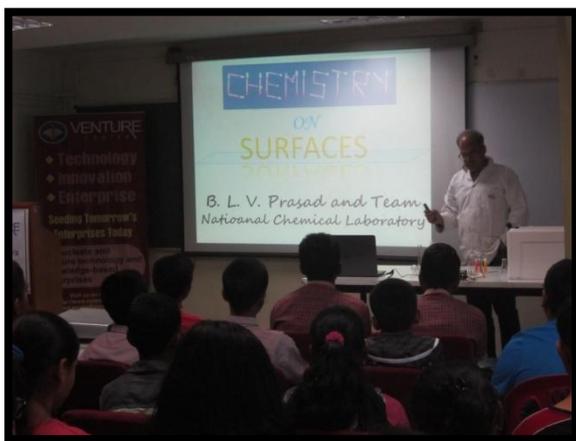

Talk on “Science and Technology of Currency Manufacturing” by Dr Anuya Nisal, Dr Kadivaran and Dr Premnath, CSIR-NCL, Pune

Talk on “Surface Tension and Wetting” by Dr Guruswamy, NCL Pune and Dr Arun Banpurkar, UoP

Talk on “Long Molecules” by Prof Julia Kornfield, CalTech, USA

Talk on “Chemistry of Surfaces” by Dr BLV Prasad, NCL Pune

What did the students who attended these talks say?

“Very nice talk. Could be understood really well.”

“I enjoyed very much.”

“I think the talk is very interesting and it needs no any kind of suggestion. It’s a very good talk I attended ever. The speaker is also experienced and I understand very well.”

“It was an interesting session. I liked the way the topic was explained and presented.”

“I would like the topic of astrophysics/quantum mechanics to be covered.”

“Simply Awesome!”

“It has been good. Looking forward to come for another talk.”

“The topic taken in the seminar was interesting. It took me to the world of chemistry.”

“Really Useful Amazing and very understanding.”

“This lecture has been absolutely amazing. I like these talks as they cover each and everything which is skipped by schools and is very interesting.”

Talk at PMC Magnet Schools

What:

Scientists (from NCL and IISER-P) visited three PMC magnet schools once a month, and delivered a talk (typically on topics from school textbooks), and interacted with the kids. At the end of the talks, students are given small gift (such as a book, or a science kit that we specially put together) that typically relates to the topic discussed. The students are also provided a snack at the end of the talk.

These talks happen during the science club and as a part of these talks we enable school students from these PMC schools to directly interact with NCL scientists and IISER-P faculty.

Schools covered:

- ***K C Thackeray Vidyaniketan, Near Daruwala Pul, Shaniwarvada***
- ***Hutatma Balvir Shirishkumar Vidyalyaya, Opp Police lines, Shivaji Nagar***
- ***Dr Vasantdada Patil Vidyaniketan, Shaniwar Peth***

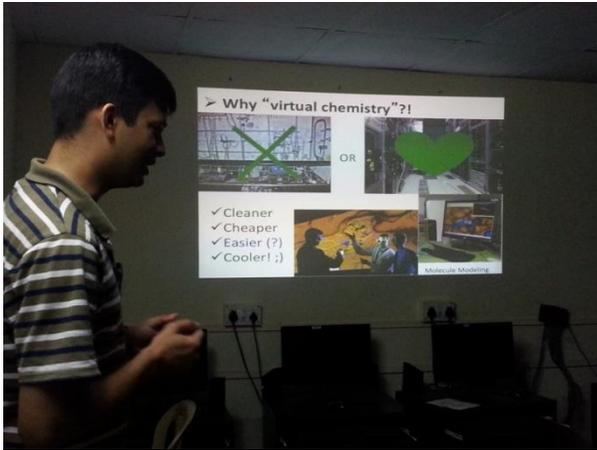

When, How Often:

These talks are typically planned once a month:

| Date | Speaker | What was the talk about? | Gift given to students | No of students |
|------------------------------|------------------------------------|---|--|----------------|
| 6,13 & 20 August 2016 | Suman Chakraborty, NCL-Pune | Virtual Chemistry: Building labs inside computers | Book titled "The Story of Chemistry" | 105 |
| 8, 10 & 24 September 2016 | Chandrasheel Bhagwat, IISER-Pune | Fun with Mathematics | Book titled "Mathematics is Fun" | 100 |
| 18 & 19 Nov 2016 | Amrita Hazra, IISER-Pune | The powerful, invisible world of the life around us | Book titled "Shot in the Arm" | 45 |
| 2, 3 & 9 Dec 2016 | Neeraja Dashputre, IISER-Pune | Scientific Discovery | <i>We have ordered books titled "Bubble bubble" and "Doing Science is Fun" from NISCAIR. As they didn't arrive on time, they will be given to students during science club sessions.</i> | 105 |
| 24 Jan 2017, 9 & 11 Feb 2017 | Arun Banpurkar, University of Pune | Light | | 138 |

Photographs from the talks:

August 2016: Talk on “Virtual Chemistry” by Dr Suman Chakrabarthy, CSIR-NCL, Pune

Hutatma School

K C Thackeray Vidyaniketan

Dr Vasantdada Patil Vidyaniketan

Sept 2016: Talk on “Fun with Mathematics” by Prof Chandrasheel Bhagwat, IISER-Pune

Hutatma Balveer Vidyalaya

Dr Vasantdada Patil Vidyaniketan

Nov 2016: Talk on “The powerful, invisible world of the life around us” by Dr Amrita Hazra, IISER-P

Hutatma School

K C Thackeray Vidyaniketan

Dec 2016: Talk on “Scientific Discovery” by Neeraja Dashputre, IISER-Pune

Hutatma Balveer Vidyalaya

K C Thackeray Vidyaniketan

Dr Vasantdada Patil Vidyaniketan

Jan-Feb 2017: Talk on “Light” by Arun Banpurkar, University of Pune

Dr Vasantdada Patil Vidyaniketan

Hutatma Balveer Vidyalaya

K C Thackeray Vidyaniketan

What did the teachers who attended these talks say?

“It was a very interesting talk I didn’t know about virtual chemistry and the talk gave an insight on this subject. The students found it interesting too.”

- Ms Hemal Aurangabadkar, Science Teacher, K C Thackeray Vidyaniketan

“The concept was explained very well. As students have learnt that molecules can be formed virtually, it sheds their fear of doing experiments in chemistry. Students will feel confident when they try experiments on computer before performing actual experiments.”

- Mrs Neeta Gulawani, Science Teacher, Hutatma Balveer Vidyalaya

Science Clubs at PMC Schools

What:

The students are mentored by research students from IISER-P during the weekly sessions. It gives a plenty of opportunity for the children to do hands-on science and enhance the science they learn in their classes. A science club session typically lasts for 1 hour to one and a half hour. In this time, the members are either engaged in science activities, or they plan/discuss/work on a science project or have a special scientific visitor. These science clubs are structured to take the student participants through a journey that starts with discovering the excitement of science; then transitions to learning the scientific method of making observations, framing hypotheses and arriving at conclusions; and winds up learning how to ask and frame research questions and develop an approach to answering this question.

When and for how long:

Once a week. Typically 1- 1.5 hours.

Where, Who attends, Volunteers:

The science clubs are run in the following schools:

**K.C.Thackeray Vidyaniketan
Daruwala Pul (KCT)**

Number of students attending per week: 29
Grade: 8

**Hutatma Balvir Vidyalaya
Police Lines (HB)**

Number of students attending per week: 32
Grade: 8

**Dr Vasantdada Patil Vidyaniketan
Shukrawar Peth (VDP)**

Number of students attending per week: 50
Grade: 8

Photographs from the science club sessions:

The Science Club Fellows conducting the Science Club sessions at the 3 PMC schools:

K C Thackeray Vidyaniketan:

Kunal Kotheekar
Research Scholar, IISER-P

Swastik Mishra
UG student, 3rd year, IISER-P

Zakhiya P C
UG student, 2nd year, IISERP

Hutatma Balveer Vidyalaya:

Saurabh Kadam
4th year BSMS Student, IISER-P

Sukanya Jogdand
UG student, 5th year, IISER-P

Rishabh Bagawade
UG student, 2nd year, IISER-P

Dr Vasantdada Patil Vidyaniketan:

Nishant Singh
2nd Year PhD Scholar, IISER-P

Nabha Shah
4th year BSMS Student, IISER-P

Dnyanesh Dubal
3rd year PhD, IISER-P

MAY & NOV 2016: Workshop: “On Assessing Environmental Change using Satellite Data”

About the Workshop:

The Exciting Science Group conducted 2 three-day workshops on “On Assessing Environmental Change using Satellite Data”. The workshops were held between 12 -14 May 2016 and 12-14 Nov 2016 at the Venture Center, Pune, and were targeted at children between the ages 12 – 14 years. 40 students from 25 schools participated in this workshop, including 10 students from 3 Pune Municipal Corporation Schools (4 from KC Thackeray Vidya Niketan, 2 from Dr Vasantdada Patil Vidyaniketan and 4 from Hutatma Balvir Vidyalaya). Through the 3-day workshop, students were introduced to the GRASS Geographic Information Systems (GIS) software used for geospatial data management and analysis, image processing, graphics and maps production, spatial modeling, and visualization. Students from PMC schools used computers provided by the Venture Center, while the others brought their own laptops.

Details:

| Date | Speaker | Title | Duration | No. of Participants | No. of Volunteers |
|---|--|--|------------------|---------------------|-------------------|
| 12 – 14 May, 2016 & 12 – 14 Nov, 2016 | Dr Rahul Chopra, FLAME University Pune | On Assessing Environmental Change using Satellite Data | 2.5 hrs / day | 40 | 6 |

Workshop sessions were conducted by Dr Rahul Chopra, Chair of Centre for Earth and Environment and Associate Professor at FLAME University, Pune. Dr Chopra introduced the participants to the tools and techniques to assess environmental changes using remotely sensed data from satellite and learn the techniques to highlight issues such as urban expansion, changes in forest cover, melting of glaciers, natural and man-made disasters in India and the world. Participants also learnt about the sources of free satellite data such as data from the LANDSAT series of satellites, data disseminated by NASA and USGS. Volunteers drawn from the student body of IISER-Pune and FLAME University including a high school student guided the participants during the workshop. At the end of the 3-Day workshop, students learnt to create posters that demonstrate large scale changes in our environment.

All participants received a certificate of participation while volunteers received a certificate of appreciation along with a T-shirt and mug from ESG. The registration of participants and volunteers was coordinated by Shraddha Gargatti.

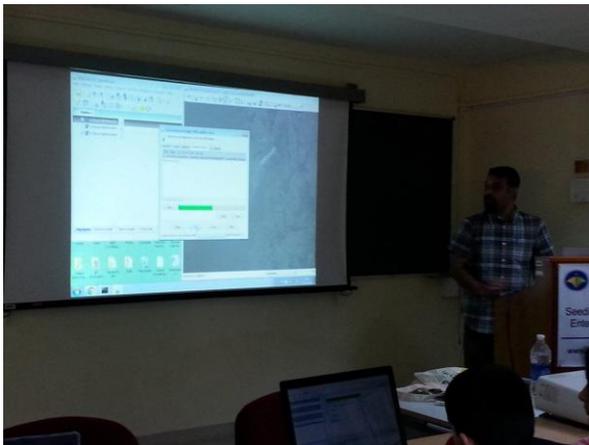

Photographs from the Workshops:

Introduction of the speaker by Dr Guruswamy, Scientist, NCL Pune & ESG coordinator

Introduction to the workshop by the speaker Dr Rahul Chopra, FLAME University

Dr Chopra explaining GRASS GIS software to the participants

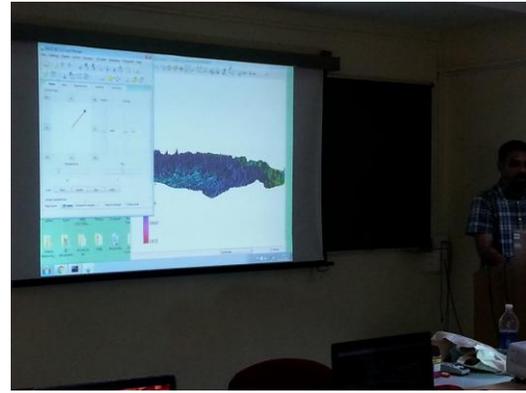

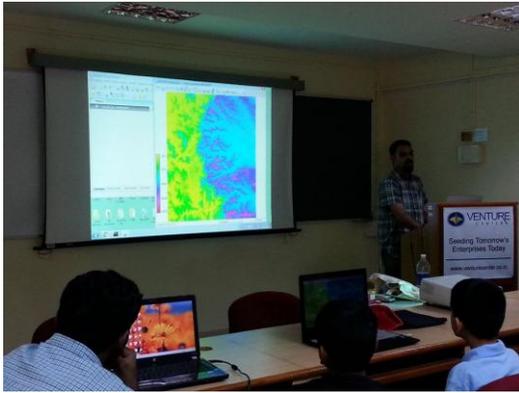

Workshop participants exploring the GIS software

Student Volunteers Wadikur Rehman and Sukanya Jogdand from IISER-Pune guiding the participants during the workshop

Dr Chopra explains the digital elevation data and 3-D Visualization Techniques

Participant Students exploring the techniques

What did the participants who attended these talks say?

After the workshop, kids were asked to fill up an evaluation form in which we had asked the kids to rate us between 1 and 5 (1-Poor; 2-Okay; 3-Good; 4-Very Good; 5-Excellent) on each of the activity (content, explanation by faculty, overall rating, etc). Overall, both the sessions got a rating of either 4 or 5. We also took a feedback on the part of the workshop they enjoyed the most. More than 70% of the participants equally enjoyed the explanation, demonstration, using GIS software and creating posters.

Also, the students were asked for their feedback and suggestions, the following are what they had to say:

“Overall workshop was good, useful for me actually. Our mentor explained the terms very nicely. One suggestion that I would give that the workshop should be for 1 or 2 days more.”

- **Ojas Gopal Kulkarni, DAV Public School**

“I liked the workshop very very much. At first I was not able to understand but at last I understood it very easily.”

- **Sanika Ranjeet Shinde, K V No. 1, Dehu Road**

“Could you please add workshops for HTML, PHP, JAVASCRIPT and Python?”

- **Dhurva Sanjay Ingale, DAV Public School**

“Please conduct the workshop for a bit more days.”

- **Anurag Ravikiran Lad, J.P.N.V Nigdi**

“Comment: I am so happy to attend this workshop. This made me gain my interest and knowledge in order to use computer or any kind of software.”

Suggestion: Now in future if this type of workshop occurs the level of understand the work should be more complex and will help to learn more.”

- **Vedang Dinesh Phadke, Bharatiya Vidya Bhavan**

"I would like to attend another workshop for pilots...This workshop was very well performed! It encouraged me to learn things."

- **Vaidehi Vaibhav Sadavarte , St Joseph's High School**

"It was a very exciting workshop. I got to learn a lot of things from the workshop and would be interested in more workshops conducted at NCL. Thank you"

- **Sarah Mooley, Bishops Co-Ed School**

It was very good. Worth Coming. I enjoyed it a lot!

- **Mishka Maheshwari, Dr Vikhe Patil School**

"The next workshop should be based on astronomy, exploring space, etc

- **Rutuja Bulakh, Bharatiya Vidya Bhavan**

"It was all perfectly planned and done. I enjoyed it and wish it could go on for longer periods of time."

- **Karan Kailashkumar Solanki, K C Thackeray Vidyaniketan**

"It was very nice.I enjoyed it throughout. I enjoyed the 3D part and the poster part the most. It was nice 😊"

- **Maitree Meher, Air Force School**

MAY 2016: Workshop: Having Fun with Scratch Programming

The Exciting Science Group conducted a 5-Day workshop on “Having Fun with Scratch Programming”. These workshops were held in May 2016, at the Venture Center, Pune, and were targeted at children between the ages 8 – 10. 29 students from 27 schools participated in the workshop, including 5 students from 3 PMC schools. (2 from Dr Vasantdada Patil Vidyaniketan, 2 from KC Thackeray Vidya Niketan, and 1 from Hutatma Balvir Vidyaniketan). Through the 5 day workshop, students were introduced to the fundamentals of Scratch, a graphical programming interface developed by the Media Lab – MIT, and available for free download.

Details:

| Date | Speaker | Title | Duration | No. of Participants | No. of Volunteers |
|-----------------------------------|----------------------|---|-------------------------------|---------------------|-------------------|
| Mon – Fri, 16 – 20 May 2016 | Shraddha Gargatti | Having Fun with Scratch Programming | 2.5 hrs/ day for 5 days | 29 | 6 |

The workshop sessions were conducted by Shraddha Gargatti over a 5-day period, from Monday to Friday in May 2016. Students from PMC schools used computers provided by the Venture Center, while the others brought their own laptops. Ms Gargatti introduced logical structures and programming through the scratch interface. Interesting animation and games were demonstrated using controls and webcam. The use of the Sensor board, hardware was also demonstrated to develop interactive interfaces between the programming environment and the real world (viz. use the computer to “sense” sound and light stimuli using the USB Sensor board). At the end of the workshop, children were able to develop their own animation, games and graphic stories. On the last day participants were given a chance to develop their own story or game. A competition was organized for the best game or story. The participants were given two hours to work on their ideas and present their project. Dr Sutirth Dey, Associate Professor at IISER-Pune was present on the last day to view the projects made by the young participants. Three best projects were chosen and gifted a prize by ESG.

Volunteers drawn from the student body of the Indian Institute of Science Education and Research (IISER), Pune including a parent helped Shraddha run each workshop session. These volunteers were oriented by Shraddha prior to the start of the workshop. All participants received a certificate of participation at the end of the workshop while volunteers received a certificate of appreciation along with a T-shirt and mug from ESG. The registration of participants was coordinated by Gayatri Kshirsagar and registration of volunteers was coordinated by Shraddha Gargatti.

Photographs from the Workshops:

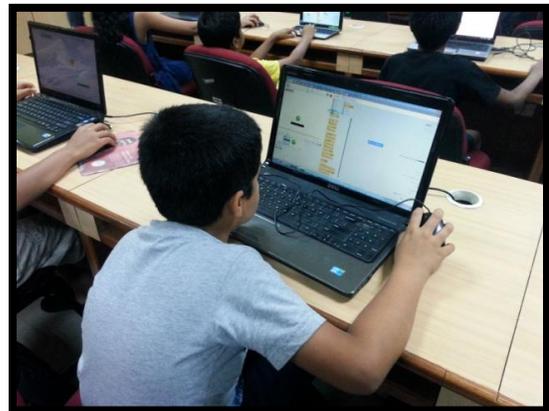

Shraddha introducing Scratch interface to the participants

Participants exploring Scratch software

Participants learn to use the programming blocks in Scratch to make a game/story

Participants attempting to program a Pong Game

Participants attempt to make their own game/story on the last day

Dr Sutirth Dey viewing the projects made by participants

Workshop participants with their certificates

What did the participants who attended these talks say?

After the workshop, kids were asked to fill up an evaluation form in which we had asked the kids to rate us between 1 and 5 (1-Poor; 2-Okay; 3-Good; 4-Very Good; 5-Excellent) on each of the activity (content, explanation by faculty, overall rating, etc). Almost all the participants gave a rating of 5. We also took a feedback on the part of the workshop they enjoyed the most. 50% of the participants enjoyed the demonstration programs the most.

Also, the students were asked for their feedback and suggestions, the following are what they had to say:

"I love the workshop. I love Scratch games"

- **Advaith R, The Orchid School**

"I had lot of fun. It was the best time of my life."

- **Vibhavari B, St Joseph's High School**

"Very good planned."

- **Karan Solanki, K C Thackeray Vidyaniketan**

"I like the workshop. It was nice."

- **Laxmi Ghotekar, Millenium National School**

"The teachers teach very well and this class was the best class ever."

- **Harika, Wisdom World School**

"I loved the workshop and I pray to god it should continue."

- **Anish Deshpande, Victorious Kids Educare**

"I like the workshop so much."

- **Shraddha Kulkarni, Vision English School**

MAY 2016: Workshop: Raspberry Pi Programming

The Exciting Science Group organized a 3-Day workshop on “**Raspberry Pi Programming**” in May 2016, at the Venture Center, Pune, and were targeted at PMC school children from grade 7 and 8. 26 students from 3 PMC schools participated in the workshop. (8 from Dr Vasantdada Patil Vidyaniketan, 10 from KC Thackeray Vidya Niketan, and 8 from Hutatma Balvir Vidyaniketan). Through the 3 day workshop, students were introduced to the open-source hardware tool known as Raspberry Pi, a credit card-sized computer developed by the Raspberry Pi Foundation, UK, to promote basics of computer science in schools. It is an extremely versatile device which can be used to design and build electronics projects that interact with the real world. The device has gained popularity recently as an effective means to engage in exploring STEM concepts and practices.

| Date | Speaker | Title | Duration | No. of Participants | No. of Volunteers |
|-----------------------------------|-------------------|--------------------------|-----------------------|---------------------|-------------------|
| Wed – Fri, 25 – 27 May 2016 | Dr Girish Arabale | Raspberry Pi Programming | 7 hrs/ day for 3 days | 26 | 2 |

Workshop sessions were conducted by Dr. Girish Arabale, founding director of a startup called Molqbits (incubated at NCL Innovation Park). During the workshop, Dr Arabale taught students how to use command line interface, how to solve problems with Wolfram| Alpha- a computable search engine on Raspberry Pi. Once they became a little comfortable in using the device, they were introduced to Mathematica and Wolfram programming language that are freely available on Raspberry Pi. Students successfully learned to calculate even, odd, and prime numbers using Mathematica. Later on they wrote programs for simple conversions like Fahrenheit to Celsius, and more advanced like finding Palindrome numbers and Perfect Numbers. They also learned about GPIO and to connect LEDs to different pins on Raspberry Pi. On the last day, Dr Arabale showed them how to use camera interface along with a few basic image processing commands. Students learned how to calculate the extent of photosynthesis from the plant leaf images with a little bit of programming. Participants were provided with Raspberry Pi boards and computers arranged by ESG along with fruit juice and refreshments during the workshop.

The registration of participants was coordinated by Gayatri Kshirsagar. Shraddha and Gayatri helped Dr Arabale run each workshop session. At the end of the workshop, all participants received certificate of participation from ESG.

Photographs from the Workshops:

Speaker Dr Girish Arabale explains the Raspberry Pi to the participants

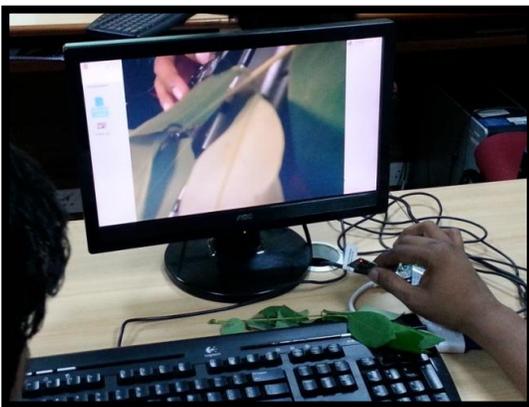

PMC school students in the workshop

Participants explore Mathematica to calculate even, odd, and prime numbers

Participants learning to connect LED

Participants use the camera interface to capture the plant leaf images to calculate the extent of photosynthesis using image processing commands

Workshop Participants

What did the participants who attended these talks say?

After the workshop, kids were asked to fill up an evaluation form in which we had asked the kids to rate us between 1 and 5 (1-Poor; 2-Okay; 3-Good; 4-Very Good; 5-Excellent) on each of the activity (content, explanation by faculty, overall rating). Overall, all the sessions got a rating of either 4 or 5. We also took a feedback on the part of the workshop they enjoyed the most. All the kids enjoyed

Also, the students were asked for their feedback and suggestions, the following are what they had to say:

Ajit Badambe, K C Thackeray Vidyaniketan:

Other comments or suggestions:
RaspberryPi Workshop was helpful to me because I get to learn more usefull and important information about electronics. I learned it now and I will get more use in colleges when I do my engineering. There are many things that I learned.

Pranita Deshmukh, Dr Vasantdada Patil Vidyaniketan:

Other comments or suggestions:
I Like this worshop because we learn so many things, so I like it very much. & we study from practical so like it. I thing we attain this workshop again & again.

Dhanashree Mane, Hutatma School:

Other comments or suggestions:
मला हा Workshop खूप आवडला.
मला या Workshop मध्ये Mathematica, wolframalpha, Electronics आणि इतर विषय खूप आवडले.
या Workshop मध्ये मी तीन नवीन विषय शिकले.

Omkar Shinde, Dr Vasantdada Patil Vidyaniketan:

Other comments or suggestions:

मला हे वर्कशॉप खूप आवडले. येथे
आम्हाला अनेक गोष्टी शिकायल्या मिळाल्या. त्यात
आम्हाला कधी न माहित असलेल्या 'रसबेरीपाच'
ची माहिती सांगितल्या ती आपण कोठेही वापर
करू शकतो त्याच्या मदतीने आपण कॉम्प्युटरवर
बसून अनेक गोष्टी घालवू शकतो. येथे आम्हाला
अनेक शिक्षकांनी शिकवले. मी त्यांचे आभार
मानतो

Thanks

Vaishnavi Devkar, Hutatma Balvir Vidyalaya:

Other comments or suggestions:

मला स इथे खूप कधी शिकण्यासाठी भेटले, तिथे मला माहिती
कशी शोधायची ते कळाले त्यातील सर्वात Interesting mathematical
हीती ते मला खूप आवडले त्या कसलेही प्रश्न माहितीचे प्रश्न विचारले
तर त्यांचे उत्तर लगेच यायचे.

Maruti Bandgar, K C Thackeray Vidyaniketan:

Other comments or suggestions:

Raspberry workshop was helpful for
me. I got to learn many things in these
3 days and I ~~enjoyed~~ enjoyed it. I learned
new thing which I never heard of it
before. I loved the workshop
and I would like to come here
again

April – June 2016: Summer Internship Programme

About the programme: Starting last year, the Exciting Science Group initiated the Summer Internship Programme for the PMC students between April to June. The objective of the internship programme is to provide an opportunity for students to work with mentor scientists and PhD students at NCL and experience what it means to work in a research laboratory over a period of two full months.

This year, we selected three students from two PMC schools we partner with, for the programme: Hutatma Balveer Shirishkumar Vidyalaya, and K.C Thackeray Vidya Niketan.

The three students spent their entire summer break from 15 April 2016 to 15 June 2016 in research laboratories at CSIR-National Chemical Laboratory, Pune.

| Name of the student | Name of the school |
|---------------------|--|
| Vaishnavi Devekar | Hutatma Balveer Shirishkumar Vidyalaya |
| Deshmukh Nishad | K.C. Thackeray Vidyaniketan |
| Abhishek Nindgali | K.C. Thackeray Vidyaniketan |

Dr. Chetan Gadgil, scientist at CSIR-NCL, along with his PhD student Priyanka Saxena mentored Vaishnavi Devekar on the project “To study the length to breadth ratio of different petals and leaves”

Dr. BLV Prasad, scientist at CSIR- NCL, mentored Deshmukh Nishad and Abhishek Nindgali. Both worked with one of the Ph.D student, Jayesh Shimpi, to study the different methodologies involved in synthesis of nano-particles.

ESG organized orientation session for the students, parents and teachers on 15 Apr 2016. Students maintained a weekly report of the work done by them in the laboratory. This activity helped them record and interpret the observations. They also learned to present the data of their laboratory work. Gayatri Kshirsagar coordinated with these students, their parents and teachers during the internship programme.

A felicitation event was organized by ESG after the internship to meet these students and their scientist mentors at the end of this programme. The students gave a brief presentation of their work and also shared their learning experience during the event.

Photographs of the Summer Internship Programme:

Deshmukh and Abhishek working in Dr Prasad's lab under the guidance of Jayesh

Vaishnavi (3rd from left) along with Priyanka and other PhD students in Dr Gadgil's lab

Feedback from students:

"This was a very wonderful opportunity for me to come here and learn the things which I didn't know before. I would like to thanks my mentors Dr.B.L.V. Prasad Sir and Jayesh Bhaiya for supporting me for learning anything in lab and I would also like to thanks all my lab mate for helping me whenever I need it. I would like this program to continue so that others should learn science."

- Deshmukh Nishad, K C Thackeray Vidyaniketan

"This program is very nice. Due to this program I got to know many new things. I think this program should continue like this it shouldn't stop. I want to thank my school for giving me this golden chance and they have a big hand in this. I want to thank all our lab mates they never let me feel alone whenever I had a question they all answered it. They taught me lots of new things. I want to specially thank Prasad sir for giving me permission to work in his lab."

- Abhishek Nindgali, K C Thackeray Vidyaniketan

June 2016: Workshop on “Science Club Training”

Half-Day Workshop on “Science Club Training” was organized by ESG in collaboration with GREAT Foundation to take the idea of the science club programme that we have developed over the years and provide training for this to be replicated by teachers in schools. 12 Teachers from 9 PMC schools and 36 corporate volunteers participated in the workshop. The workshop was conducted by students volunteers Harshvardhan Jog, grad student at IISER-Pune and Priyanka Saxena, PhD student at CSIR-NCL, Pune. Both have been associated with ESG in the past as science club mentors.

The purpose of this workshop was to provide a framework for science club sessions for 7-9 standard school kids. The idea was to highlight the skills required for scientific experiments and present a possible stepwise methodology of inculcating these skills.

| Date | Speaker | Title | Duration | No. of PMC teachers | No. of Corporate Volunteers |
|------------------|------------------------------------|-----------------------|----------|---------------------|-----------------------------|
| Sat, 4 June 2016 | Harshvardhan Jog & Priyanka Saxena | Science Club Training | 3 hrs | 12 | 36 |

The workshop started with some experiments which can make science approachable and exciting for the kids. Priyanka and Harsh demonstrated magic message by using turmeric-detergent, straw flute, paper chromatography and a simple surface tension experiment with pepper and detergent. After a brief discussion on possible alternatives and possible problems in conducting these experiments they moved on to see how interesting questions can be asked using simple but exciting experiments. For this, the glue-borax experiment was demonstrated. They took a short interlude to let the teachers try the experiment themselves. After re-emphasizing how exciting experiments can be used to make observations and asking questions they discussed the importance of observations in more detail. The teachers were asked to observe two burning candles and make notes. This was followed up with some discussion on unusual and interesting observations that can be made without being told what to look for. A few interesting observations and the significance of unbiased observations in science were then discussed. The observations led to some questions for which both discussed some possible answers/guesses (hypotheses). Participants were showed a video of an activity conducted by Dr. K P Mohanan to explain how hypotheses can be tested and eliminated. Through this video it was highlighted how unacknowledged assumptions can cause trouble in scientific experiments.

To put all the elements together viz. making observation- asking questions-formulating hypotheses-testing and eliminating hypotheses they demonstrated heat conduction experiment, here candle wax on metal rods melted as a function of distance from the burner flame. This experiment can also be used to discuss the concept of error, importance of repetition, tabulating data and plotting the results. As an alternative to this experiment they discussed Winogradsky column where the results are qualitative unlike heat conduction experiment. Discussion was done on some ways that can be suggested to the kids which can make internet search more effective for them and importance of referring to trustable sources of information.

ESG REPORT

Priyanka and Harsh concluded the discussion by re-emphasizing the aspects of this framework for going from majorly teacher facilitated science lab sessions to majorly children driven science experiments. At the end they had an open discussion on how difficult/easy it is for the kids to think independently and come up with interesting questions. The idea was also summarized by a TED talk by Beau Lotto. The teachers seemed enthusiastic to try the framework (or some parts of the framework) discussed in the workshop in their classes.

Photographs:

Introduction to the workshop by Dr Guruswamy, Scientist, NCL Pune and ESG Coordinator

Priyanka Saxena and Harshvardhan Jog conducting the workshop session

Participants: Teachers from PMC schools and Corporate volunteers

What did the participants who attended the workshop say?

After the workshop, participants were asked to fill up an evaluation form in which we had asked them to rate the session between 1 and 5 (1-Poor; 2-Okay; 3-Good; 4-Very Good; 5-Excellent) on each of the activity (content, explanation by faculty, overall rating). Overall, the workshop got a rating of either 4 or 5.

The participants were also asked to share their feedback and suggestions, the following are what they had to say:

“Good Workshop and learned a new way to teach students.”

- Theja Dokku, Cognizant Technology Solutions (For Nagubarve PCMC School)

“Humare school ke baccho ko bhi science club ke liye tayaar karne mein aapki help chaiye.”

- Haveli RehanaMohiuddin, M M Urdu Vidyaniketan

“It’s really a helpful session. It will help to remove the fear of students.”

- Rakesh Rameshchandra Jain, Eaton Tech Pvt Ltd

“This type of training should be for all subject teachers, not only for science teachers.”

- Shaikh Zaheeda Husain, PMC’s Maulana Md Ali Urdu Madhayamik Vidyaniketan,
- Nikhat Jabeen Malek, S S Hakim Ajmal Khan Urdu High School, Yerwada

“Use of Marathi is also necessary in the explanation. Overall, it is a good training.”

- Deshmukh Ambadas, Yashadeep Madhyamik Vidyalaya, Warje

“Really a nice activity. Being an engineer, never thought of science the way it is demonstrated in the session today. Great work and keep it up!!!

- Sandesh Vardhekar, Cognizant Tech Solutions (for PMC Swami Vivekanand School)

June-July 2016: Science and Art Competition

This year, Exciting Science Group (ESG) organized “Science and art competition” in two phases, on 25 June and 16 July 2016 respectively, considering overwhelming response from various city based schools. The objective of this competition was to motivate students to understand the correlation between science and art thereby boost their imagination and creativity. It was a really good platform to the students who are good in illustration skills and encouraged their thinking skills in scientific concepts.

1. Science and Art competition (25 June 2016) : At Hutatma Balveer Shirishkumar Vidyalaya

On Saturday, 25th June 2016, Exciting Science Group organized first phase of “**Science and Art competition 2016**” for Pune Municipal Corporation (PMC) schools at Hutatma Balveer Shirishkumar Vidyalaya from 10 am to 1:30 pm.

102 students from the following 8 PMC schools participated: Hutatma Balveer Shirishkumar Vidyalaya, K.C Thackeray Vidyaniketan, Dr. Vasantdada Patil Vidyaniketan, Babu Jagjeevan School, Ahilyadevi Holkar School, Swami Vivekanand School, Smt. Shantabai Balkrishna Dhole Patil School and Savitribai Phule Prashala.

The students were given the following topics based on science on the day of the competition:

1. A day in a science lab
2. The world without water
3. If I were Microorganism
4. My dream car

Renowned **artist Ravi Paranjape** was the Chief Guest and artist Jayanti Patil was the judge for the event. During the event, the chief guest Mr. Ravi Paranjape addressed the students about correlation between Art and Science. He said, "Science and art are fields which could only be developed through an innovative approach. Students must start questioning everything and should think beyond their curriculum. They have to believe in their perception. This will help us with innovations in science as well as nation-building activities."

2. Science and Art competition : (16 July 2016) : At Venture Center

On Saturday, 16th July 2016, ESG organised a special science talk on “**The art and Science of colour**” and second phase of “**Science and Art competition 2016**” at Venture Center from 10.00 am to 1.30 pm. It was open to all the city based schools. The goal of this combined event was to give insights on how science played an important role in making variety of colours, also to brief them about the history of colors, our traditional art forms and techniques used in art conservation. ESG received more than 200 student registrations from 40 schools across the city for this event.

Dr. Sayam Sengupta (Scientist at CSIR –NCL) who was the speaker for this special popular talk addressed the students on the topic “**The art and Science of colours**”. He briefed the students about the colourful history of paints since 5th century AD till date, especially about Lapiz Lazuli: Ultramarine blue obtained from Lapis stone, Prussian Blue, and Cochineal red which is obtained from specific species of a bug. He explained how colours are formed through various chemical reactions and the role of various binders in the paints.

He showed mesmerizing paintings from ancient caves to canvas, like paintings from Caves Lascaux, France , Bhimbhetka from Madhyapradesh, India, Bodhisattva Padmapani at Ajanta Caves, till the Michelangelo's the most influential works in Fresco in the western art history , Portrait of a Young Man by Raphael, Blue print by Astronomer Sir John Herschel, Mona Lisa by Leonardo da Vinci, Pablo Picasso's special two face paintings. He also advised students to visit historic sites and restore our cultural heritage and beauty of such masterpiece.

This informative lecture was followed by "Science and Art" competition" for 7th to 10th grade students.

This competition was conducted in two groups:

Group 1: For 7th and 8th standard students

Group 2: For 9th and 10th standard students

For the competition, following topics based on Science and technology were given :

1. The world without Technology
2. Indian Agriculture in the year 2050
3. A life on another planet

Dr. Shivprasad Patil (Associate professor at IISER) was the Chief Guest and Artist Jayanti Patil was the judge for the event.

During both the phases of Science and Art competition, all the participants received colouring materials and certificate of participation from the Exciting Science Group. Participants were also provided with refreshment during the events. The winners were felicitated with prizes at the end of the competitions.

Photographs from the competition:

Dr Sayam Sengupta addressing the students during the talk "The Art & Science of color"(16 July 2016)

Artist Ravi Paranjape addressing the students during the Science and Art competition (25 June 2016)

Participants engrossed making drawings based on Science and technology

Winners of “Science and Art competition” held on 25 June & 16 July 2016:

• **Science and art competition: 25 June 2016**

| Position | Name | School | Topic |
|-----------|------------------|--|-------------------------|
| Winner | Suraj Kamble | iTeach - Babu Jagjeevan school | A day in science lab |
| Runner Up | Laxman Prajapati | iTeach school - Ahilyadevi Holkar school | The world without water |
| Runner Up | Prachi Balla | K C Thackeray Vidyaniketan School | The world without water |
| Third | Sahil Ujagare | Dr. Vasantdada Patil Vidyaniketan School | My dream car |

• **Science and art competition: 16 July 2016**

1. **Group A : 7th and 8th standard students**

| Position | Name | School | Topic |
|-----------|---------------|-----------------------------|-------------------------------------|
| Winner | Ruhi Kabra | Vidya Valley school | A life on another planet |
| Runner Up | Isha Vakikar | CBT Sadhana Vidyalaya | The world without technology |
| Third | Aarya Bhawsar | Modern school , Ganeshkhind | Indian Agriculture in the year 2050 |

2. **Group B: 9th and 10th standard students :**

| Position | Name | School | Topic |
|-----------|------------------|------------------------------------|-------------------------------------|
| Winner | Khushneet Kaur | City International School, Pimpri | Indian Agriculture in the year 2050 |
| Runner Up | Pallobeit Biswas | Army Public School Kirkee | A life on another planet |
| Third | Aishvarya Joshi | Navbharat highschool, Shivane | Indian Agriculture in the year 2050 |
| Third | Aarya Kabra | City International School , Pimpri | A life on another planet |

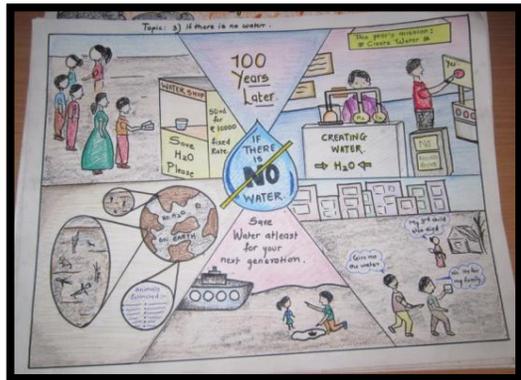

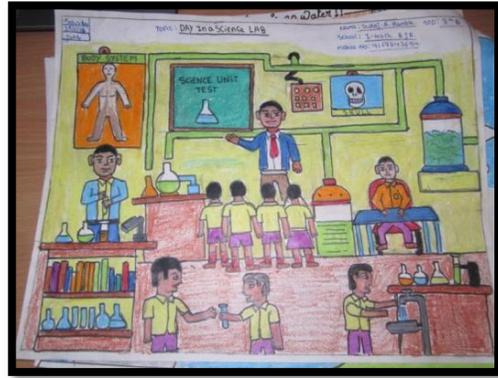

Winners with Chief guest Dr Shivprasad Patil and Artist Jayanti Patil

Winners receiving prize from Artist Paranjape

Winners Drawings

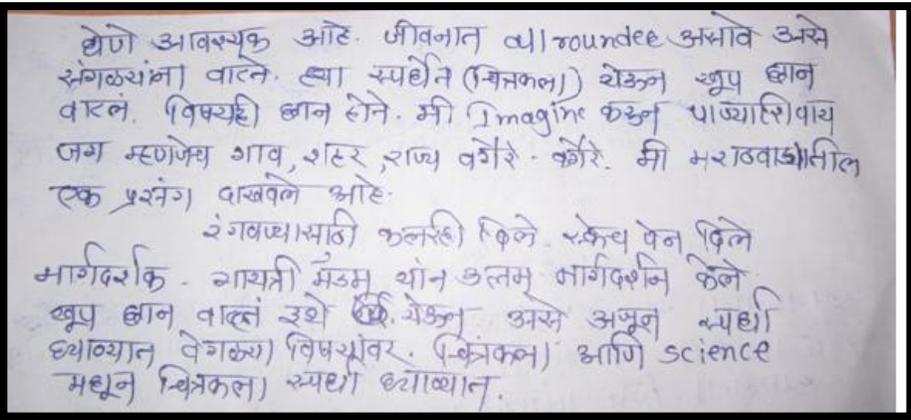

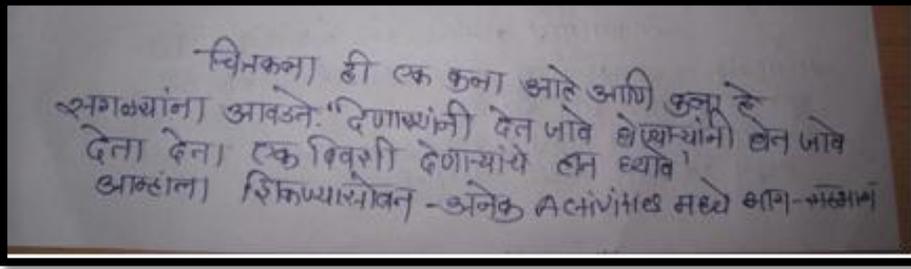

What did the competition participants say?

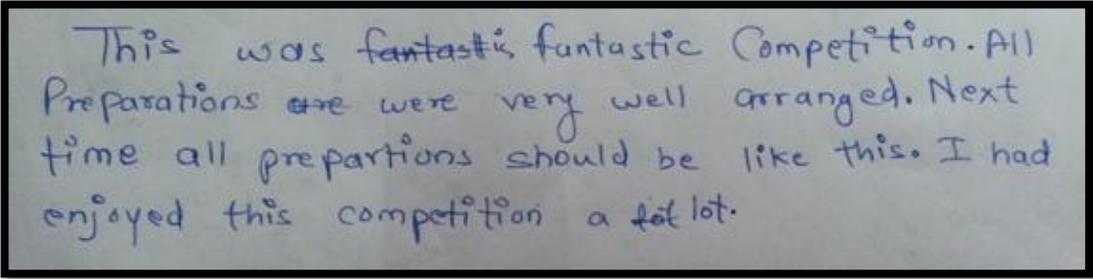

Science and Art competition: 25 June 2016

After the event, the PMC school students were asked for their feedback and suggestions, the following are what they had to say:

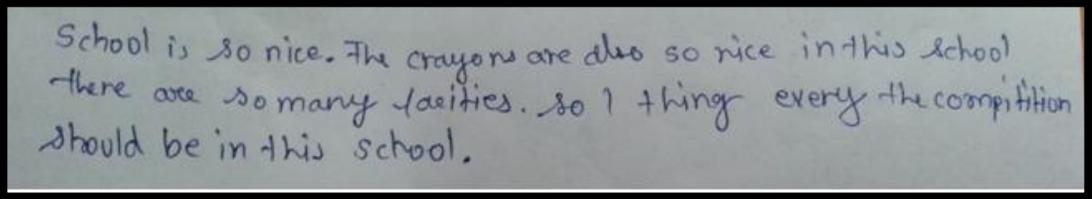

Kirtiraj Mandakar, Dr Vasantdada Patil Vidyaniketan:

Chirag Shinde, K C Thackeray Vidyaniketan:

Laxman Prajapati, Ahilyadevi Holkar School:

Science talk and Art competition: 16 July 2016

After the combined event of Science talk and Art competition, the students were asked for their feedback and suggestions, the following are what they had to say:

Aadit Dane (Millennium National School)

Very fun, interesting talk. I didn't want it to stop. amazing explanation. Perfectly fitted into & simpler words. Very good, fresh experience. Will surely share with ~~othe~~ others. Will come to ~~other~~ other talks surely. Very interesting topic. Whole lecture, the topic was on ~~to~~ track the whole lecture.

Alok Shinde (Army Public School. Kirkee)

Yes, I understand by the competition where I stand in the world of Art. and This is very important game.

Nikita Nikam (City International School, Pimpri)

Very fun and interesting. Enjoyed a lot. Got many new things to know. Very interesting topics and gave us chance to show our creativity and imagination.

Shree Bhavsar (Vidyanand Bhavan High School)

The lecture given by Mr. Sayam Sen on topic 'Art and science of colour' was fantastic because he told the history of the colour. and shows many picture of Ancient drawing. he told how colour blue and red exist. he show traditional ancient picture of Ajanta caves.

ESG REPORT

Kishore R. (DAV Public School)

Even though I have no hopes of winning the competition, I loved it because it made me think and put my creativity to use.

Sneha Vedpathak (Pawar Public School , Nanded City)

The lecture given by sir was fabulous. I also like the PPT. I enjoyed the competition and it should be twice a year.

Amol Patil (Lonkar Madhyamik Vidyalaya Mundhawa)

Ajanta caves, Great works of art are susceptible to effects of aging. I like this topic because there was information about Ajanta caves and Great works about painting, colouring, and many more activities and thinking power of them.

Aakanksha Panasare (Jnana Prabodhini Prashala)

It was an interesting topic. Explanation, with examples was very involving and interesting. I would like to attend more talks. It was an interesting scientific lecture, and scientific concepts were explained so they were easy to understand.

Juee Chandrachud (Jnana Prabodhini school)

The lecture was very nice and the explanation was very good. The lecture was very short. It was very amazing and interactive. The speaker explained the topic very nicely and it was very engaging. The topic was different and it was conveyed nicely. It would have been ok if the lecture time would have been more.

Preparatory Workshops & Mentoring Session for Research Projects

2 Preparatory Workshops and 1 Mentoring Session for Research-based projects were organized in Nov 2016 and Feb 2017 respectively in order to guide students currently enrolled in Class 8 and 9 to submit a research-based project in the ESG Science Fair 2016-17. 202 students from 37 schools participated in these preparatory workshops. Dr.Guruswamy, Scientist NCL and ESG Coordinator conducted these workshops. In the past, while going through the abstracts, we often found some common errors, misconceptions etc. in many projects. The objective of these workshops was to provide some handy tips which could help a student to work on a research-based project. Dr. Guruswamy shared information to highlight the important aspects of a project, how research-based projects are evaluated and the importance of having the appropriate supporting materials while working on a project.

However, this year, we received only very few entries to the ESG Science Fair. Therefore, we were unable to conduct the science fair and instead organized a mentoring session for all the participants who submitted entries for the fair. 14 students from 8 schools participated in this event. The participants were guided by Dr.Guruswamy to further improve on their project entries. They were also provided with guidance on how to submit their project as an entry to the Google Science Fair and the IRIS (the Indian National Science Fair) by Shraddha Gargatti. During this event, all the participants also received a certificate of appreciation and a gift for having sent in an entry to the ESG Science Fair.

A few of these entries have been selected for more intensive one-on-one mentoring by NCL/IISER scientists. This mentoring session is scheduled to be held in April 2017.

Preparatory Workshop in Nov 2016

Mentoring Session in Feb 2017

Jan 2017: Kutuhal Science Quiz Competition

The Exciting Science Group (www.excitingscience.org) organized its second edition of Inter-School Science Quiz Competition – Kutuhal 2017 on Saturday, 7th January 2017 at IISER-Pune. This competition was open to students of class 8 and class 9 in two phases – Preliminary Round & Final Round. The objective of the competition was to provide a unique and exciting platform for school students to encourage their thinking skills in scientific concepts.

We opened out the Science Quiz competition to school students in and around Pune. 8th and 9th standard school students from 24 schools sent in online team registrations. This year, the Exciting Science Group saw a participation of more than 135 teams viz. 270 students for the preliminary round of the competition. The preliminary round was written in which the teams had to attempt a multiple choice questionnaire. Four teams were selected for the final round including one team from a PMC Vidyaniketan School. Mr. Suresh Naik, Chairman, International Space Society addressed the audience and felicitated the finalists. All participants received a certificate of participation.

The winners received a trophy and individual mementos, while the runners-up received individual mementos. All finalists also received individual cash prizes.

| Position | Names of Finalists | School |
|------------|-------------------------------------|----------------------------|
| Winners | Chirag Falor and Prathamesh Gaikwad | St Arnold's Central School |
| Runners-Up | Mehul Shelke and Swastik shrey | DAV Public School |
| Third | Harsh Rokade and Ronit Savadimath | K C Thackeray Vidyaniketan |
| Fourth | Chaitanya Sharma and Deepesh Gavali | Hutchings High School |

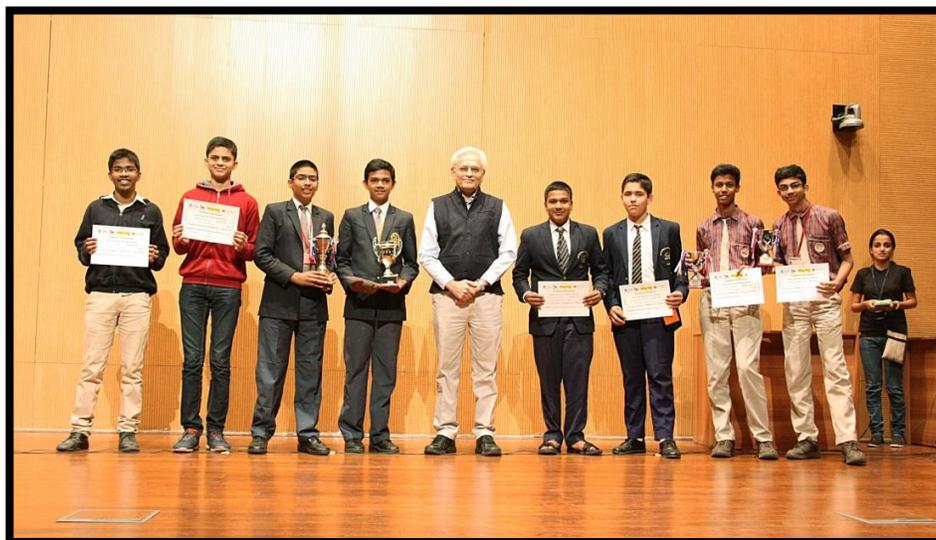

Photographs from the competition:

Final Round of Kutuhal 2017 – Sir C V Raman Auditorium, IISER-Pune

Finalists with the Chief Guest Dr Suresh Naik

March 2017: Research Idea Competition

ESG organized a Research Idea Competition for PMC schools in March 2017 as a culmination of the science club programme. Research Idea Competition is an important way for us to get the PMC school students introduced to research and to the scientific method. This year the competition was held in 2 phases: Preliminary Round at the school level followed by the Final Round at the Venture Center. **26 students viz. 13 teams from the 3 PMC schools** selected in the preliminary round participated in the competition held on Sat, 18 March 2017 and presented their research ideas to judges Dr. Amol Kulkarni and Dr Leelavati Narlikar from CSIR-NCL at the event which was held at the Venture Center. The judges selected the following teams as winners:

| POSITION | NAME OF THE STUDENTS | NAME OF THE SCHOOL |
|-------------|---------------------------------------|----------------------------------|
| FIRST | Neha Kalbhor and Priti Patil | Dr Vasantdada Patil Vidyaniketan |
| SECOND | Sumit Pandit and Avinash Bhende | Hutatma Balvir Vidyalaya |
| THIRD | Owais and Saurabh | K C Thackeray Vidyaniketan |
| CONSOLATION | Trivenee Sinnurkar and Priyanka Dhebe | Dr Vasantdada Patil Vidyaniketan |

The winners were felicitated with a science kit along with a ESG mug and a certificate. All participants received a certificate of participation and a chocolate as an appreciation for their efforts. The judges were felicitated with ESG mug for their efforts to volunteer for judging the event. ESG organized lunch for all the participants, accompanying teachers and parents after the event.

THE TIMES OF INDIA

Teens learn to use satellite data for environmental issues

TNN | May 16, 2016, 04:52 PM IST

PUNE: The Exciting Science Group, a volunteer group of scientists from National Chemical Laboratory (NCL) and the Indian Institute of Science Education and Research (IISER), Pune, based at Venture Center, recently organised a three-day workshop on 'Assessing Environmental Change using Satellite Data.'

The aim, to introduce 12-14-year-olds to the Geographic Information Systems (GIS) software used for geo-spatial data management and analysis, image processing, graphics and maps production, spatial modeling, and visualization.

The workshop sessions were conducted by Rahul Chopra, chair of Centre for Earth and Environment and Associate Professor at FLAME University, Pune.

Chopra introduced the participants to the tools and techniques to assess environmental changes using remotely sensed data from satellite and learn the techniques to highlight issues such as urban expansion, changes in forest cover, melting of glaciers, natural and man-made disasters in India and the world.

Participants also learnt about the sources of free satellite data such as data from the LANDSAT series of satellites, data disseminated by NASA and USGS. Students also learnt to create posters that demonstrated large scale changes in our environment. They also received a certificate of participation from ESG.

SAKAL TIMES – 23 MAY 2016

Exciting Science Group holds workshop for kids

HAVING FUN WITH SCRATCH PROGRAMMING

ST CORRESPONDENT
reporters@sakaaltimes.com

Pune: Exciting Science Group, a volunteer group of scientists from CSIR-NCL and IISER, Pune, based at Venture Centre, organised a five-day workshop on 'Having Fun with Scratch Programming' to introduce 8-10-year-old students to Scratch, a graphical programming language developed by the MIT Media Lab to create animation, games etc.

It is designed as the first introduction to structured logic and programming. The workshop, conducted in May, was conducted for a batch of 29 students and was free for the participants. The workshop sessions were conducted by Shraddha Gargatti, Senior Associate - Exciting Science Group.

During the five-day workshop, Gargatti introduced the participants to the scratch interface and introduced the logical and structured pr-

Children at the workshop organised by Exciting Science Group.

gramming flows. Interesting animation and games were demonstrated using controls and webcam. She also demonstrated the use of the Sensor board to develop interactive interfaces between the programming environment and the real world.

At the end of the workshop, children were able to develop their own animation, games and graphic stories.

All the participating students received a certificate of participation from ESG. This workshop was co-sponsored

by Forbes Marshall Foundation, Praj Foundation, Persistent Foundation and Nag Foundation.

ESG organises regular programmes to bring the joy and excitement of scientific research to school students. ESG will be conducting a talk on 'Atoms, Molecules and Light' on May 29.

However, pre-registration is necessary for all the events, details of which can be obtained from the ESG website (www.exciting-science.org).

Sakal Times

PUNE MIRROR 30 MAY 2016

Eminent scientist Dr Sayan Bagchi spent a part of the day talking to schoolkids about the relationship between atoms, molecules and light

In an interactive talk session on 'Atoms, Molecules and Light', students from different schools spent a part of their Sunday interacting with eminent scientist Dr Sayan Bagchi.

The talk was organised by The Exciting Science Group (ESG), a volunteer group of scientists from the National Chemical Laboratory (NCL) and the Indian Institute of Science Education and Research (IISER).

"Every object around us is made up of smaller objects, which can be further divided into even smaller particles. However, 'big' and 'small' are relative definitions and can be questioned further. Definition is surface-level understanding, which wouldn't really help students when it comes to applying these concepts. My aim was to discuss the relationship between atoms, molecules and light by giving them different examples from every life," Bagchi, who completed his doctorate in physical chemistry from the University of Pennsylvania, Philadelphia, and now works in the Physical and Materials Chemistry Division at NCL, told Mirror.

His approach certainly appealed to the students who had gathered for the talk. Vedang Dinesh Phadke, a Class VIII student from Bharatiya Vidya Bhavan, said, "I always wondered how jellyfish emit light. I got the answer on Sunday when Dr Bagchi explained how a light molecule can produce impact on another molecule and produce light through radiation. It was like a storytelling session when the concept of bioluminescence was explained to us."

Dhruva Ingale, a Class VI student of DAV Public School, said, "I had only heard of light and the concept of photons. But, at the lecture, Dr Bagchi explained these concepts by tracing the history of the journey from Albert Einstein to Arthur Compton to G N Lewis. He also explained how one theory led to another and how assumptions led to theories."

Vishwesh Patil, another student who attended the lecture, said, "Dr Bagchi asked us if light could be produced with the interaction of two chemicals or molecules. I promptly answered in the negative. But, when he gave the an example of glow sticks which produce light after mixing of two chemicals, my interest was piqued. He went on giving us examples such as fireflies and jellyfish. I've seen pictures of them, but had no idea that they worked on the same principle."

Phadke added, "I have learnt in school about the relationship between molecules, atoms and light. But, I did not know how one molecule and one light can produce another and that this is called phosphorescence. Neither did I know how one molecule and another molecule can produce light as seen in fireflies. Also, I learnt that two lights can produce a third, and that blue light is formed after mixing two red lights."

Gayatri Khsirasagar, one of the volunteers from ESG, said, "The primary objective of the talk was to have scientists share the excitement of science with school children, rather than simply teaching them. Their interest was evidently aroused as there was a flood of questions during the post-talk session."

I always wondered how jellyfish emit light. I got the answer on Sunday when Dr Bagchi explained how a light molecule can produce impact on another molecule and produce light through radiation

**VEDANG DINESH PHADKE,
A CLASS VIII STUDENT FROM
BHARATIYA VIDYA BHAVAN**

The talk caught students' interest and there were several questions following the talk.

SAKAL TIMES – 7 JUNE 2016

Raspberry Pi workshop held for 3 civic schools

The mini computer is a device which can be used to design and build electronics projects that interact with real world

ST CORRESPONDENT
reporters@sakaaltimes.com

Sakal Times

Pune: A three-day workshop on Raspberry Pi was organised at Pune Municipal Corporation (PMC) schools recently.

A total of 26 students from three PMC schools, Hutatma Balveer Shrishkumar, KC Thakare Vidyaniketan and Vasantdada Patil Vidyaniketan, attended the workshop. It was guided by Girish Arabale.

The workshop was organised by Exciting Science Group (ESG)- a volunteer group of scientists from CSIR-NCL and IISER-Pune based at Venture Center. Raspberry Pi is a credit card-sized computer developed by Raspberry Pi Foundation, UK, to promote computer science basics in schools.

It is an extremely versatile device which can be used to design and build electronics projects that interact with the real world. The device has gained popularity recently as an effective means to engage in exploring STEM (Science, Technology, Engineer-

LEARNERS ALL: Children listen to a demonstration at the ESG organised workshop on Raspberry Pi.

ing, Maths) concepts and practices.

During the workshop, students learned how to use command line interface and how to solve problems with Wolfram|Alpha- a computable search engine on Raspberry Pi.

“Once they became a little comfortable in using the device, they were

introduced to Mathematica and Wolfram programming language that are freely available on Raspberry Pi. Students successfully learned to calculate even, odd, and prime numbers using Mathematica. Later on, they wrote programmes for simple conversions like

Farhenheit to Celsius, and more advanced ones like finding Palindrome numbers and Perfect Numbers. They also learned about GPIO and to connect LEDs to different pins on Raspberry Pi.

“They learnt how to use camera interface along with a few basic image processing commands. Stu-

dents learned how to calculate the extent of photosynthesis from images of plant leaves with a little bit of programming,” said Gayatri Kshirsagar, an associate of ESG. At the end of the workshop, all students received certificates for participation.

Exciting science group lecture to be organised today

TNN | Jun 18, 2016, 04.30 PM IST

PUNE: The Exciting Science Group has organised a lecture by scientist Janardan Kundu in the series outreach popular talk on June 19. The group has been set up by scientist from National Chemical Laboratory, CSIR in a bid to popularise science.

In his lecture on Sunday Kundu will speak on 'Science and technology in everyday life'. The talk will discuss on the broad topic of science that we encounter in everyday life. It will primarily motivate students to make observations around them and try to think rationally regarding the operational science behind it. A plenty of examples of common encounter with science in everyday life will be discussed with the help of lot of audio video slides. Students would be made aware that science is powerful and all around us. However, there are instances that science can not explain what we observe and hence science is an ever evolving field.

The lecture will be held at 10 am at the training room, venture centre, NCL innovation park in Pashan. The speaker Janardan Kundu is a scientist at CSIR- NCL His area of research is rational synthesis of nano-materials targeted towards variety of applications from sensing to solar cells.

मनपा शाळेतील विद्यार्थ्यांना 'समर इंटरनशिप'मध्ये संधी

पुणे, ता. १८ : 'एक्सायटिंग सायन्स ग्रुप'तर्फे रावविण्यात येणारा 'समर इंटरनशिप प्रोग्रॅम' हा विज्ञानविषयक उपक्रम नुकताच झाला. राष्ट्रीय रासायनिक प्रयोगशाळा (एनसीएल) आणि 'आयसर' या संस्थांतील हौशी वैज्ञानिकांच्या वर्तने हा उपक्रम घेण्यात येतो. यात महापालिकेच्या विद्यानिकेतन शाळांमधील हुतात्मा वालवीर शिरोषकुमार विद्यालय आणि के. सी. टाकरे विद्यानिकेतन या शाळांतील ३

विद्यार्थी सहभागी झाले होते. त्यांना १५ एप्रिल २०१६ ते १४ जून २०१६ या कालावधीत प्रयोगशाळेत (एनसीएल) काम करण्याची संधी मिळाली. या उपक्रमाचे हे दुसरे वर्ष होते. मुलांमध्ये विज्ञानाविषयी आवड निर्माण व्हावी, या उद्देशाने हा उपक्रम घेण्यात आला. त्यातून मुलांना संशोधन म्हणजे नेमके काय, शास्त्रज्ञ प्रयोगशाळेत कसे काम करतात, पीएचडी कशा प्रकारे केली जाते, अशा अनेक प्रश्नांची उकल झाली.

SAKAL TIMES – 26 JUNE 2016

PMC students paint futuristic picture

Reporters Name | Sakal Times | Sunday, 26 June 2016 AT 11:27 PM IST

Exciting Science Group, Science and Art

Pune: A volunteer group of scientists from CSIR-NCL and IISER-Pune called Exciting Science Group (ESG) organised 'Science and Art' competition for Pune Municipal Corporation (PMC) schools on Saturday. The competition received a good response from the schools.

Sandhya Jadhav, Headmistress of Hutatma Balvir Shirishkumar Vidyalaya, told Sakal Times that the response was quite encouraging. "More than 100 students from eight PMC schools participated in the contest. The competition gave platform to the PMC students who are good in illustrations skills and also encouraged their thinking skills in scientific concepts," added Jadhav.

She added that such initiatives help the students realise that there is science in ever aspect of life.

During the prize distribution ceremony, chief guest Ravi Paranjape spoke to the students about Art and Science, and how they are correlated. "Students have to learn our ancient arts and develop their own style. This will give birth to new innovations. Students should think beyond their curriculum. They have to believe in their perception. This will help us to create new innovation in science as well as build our nation," said Paranjape.

Topics given to the students were 'Draw a day in science lab', 'The world without water', 'If I were a microorganism' and 'My dream car'.

PUNE MIRROR – 26 JUNE 2016

SEEING SCIENCE THROUGH BRUSHSTROKES

By Darshana Daga, Pune Mirror | Jun 26, 2016, 02:30 AM IST

The Students had a host of topics to draw from, one of them being 'The world without water'. PICS: MAHENDRA KOLHE

Group of scientists from CSIR-NCL, IISER organise drawing competition for PMC-run schools in order to bring out excitement and wonder of the subject

It was a rare academic treat for students of Pune Municipal Corporation (PMC)-run schools as a group of scientists organised a competition combining science and art for them on Saturday. As many as 102 students from eight different schools took part in the competition by The Exciting Science Group (ESG) – formed by experts from the Council of Scientific and Industrial Research-National Chemical Laboratory (CSIR-NCL) and Indian Institutes of Science Education and Research (IISER).

The topics given for drawing were 'A day at the science lab', 'The world without water', 'If I were a micro-organism' and 'My dream car'. "This competition aims to motivate students so that they understand the correlation between science and art, that will also boost their imagination," said NCL scientist Guruswami Kumarwami. ESG organises regular programmes to bring out the joy and excitement of scientific research among school students.

Artist Ravi Paranjape, who was the chief guest at the event, said, "Science and art are fields which could only be developed through an innovative approach. Students must start questioning everything and should think beyond their curriculum. They have to believe in their perception. This will help us with innovations in science as well as nation-building activities."

Gayatri Kshirsagar, an ESG volunteer impressed upon the uniqueness of the initiative, saying, "There are many drawing competitions organised in the city, but no one takes science as the theme." IISER scientist Sukirt Dey added, "ESG aims to create an interface between school students and practicing scientists. The primary objective of this group is to have scientists share the excitement of science with school children, and not to 'teach' science."

Students lapped up the theme with enthusiasm. "It was a challenge for the imagination. Though I learn science every day, it was difficult to visualise that and draw. But, when I completed my drawing, there was a sense of fulfilment," shared Prachi Balaji Balla from K C Thakare Vidya Niketan School.

Laxman Prajapati from Ahilyadevi Holkar School, who had chosen the topic, 'The world without water', said, "When I started to think on my picture, I recollected the recent issue of farmer suicides owing to the severe drought in the state. But, it is not just the humans who would be in trouble. The entire ecosystem would be lost without water. So, I incorporated both the things in my drawing."

SAKAL MARATHI - 28 JUNE 2016

शेवाजीनगर : हुतात्मा बालवीर शिरीषकुमार विद्यालयात घेतलेल्या चित्रकला स्पर्धेत विद्यार्थ्यांनी काढलेली चित्रे.

चित्रकलेत सूरज कांबळे प्रथम

एकदापटीत घडवून घेण्या (इंग्रजी) यांनी अंतराळाचे विस्फोट स्पर्धा घेण्या आली. या स्पर्धेत महाराष्ट्राच्या आठ विद्यार्थिकांना शाळांमध्ये १०२ विद्यार्थी सहभागी झाले होते. स्पर्धेत काजू जगादीसम शाळेतील सूरज कांबळे याने प्रथम क्रमांक मिळविला आहे.

'इंग्रजी' लगे 'विज्ञान आणि कला' यावर आधारित ही स्पर्धा संपन्न आली. या स्पर्धेसाठी चित्रकला रवी परांजने प्रमुख पाहणे म्हणून जमविले होते. कार्यक्रमाचे समन्वय याचही खोरासुर यांनी केले. 'विज्ञान प्रयोगशाळेत एक दिवस', 'साप्ताहिक साप्ताहिक', 'साप्ताहिक साप्ताहिक' असे विषय स्पर्धेसाठी दिले होते. स्पर्धेत उत्तम प्रजापती (अहिल्यादेवी

होळकर शाळा) आणि प्राची बाल (केमरी) यांनी द्वितीय क्रमांकाचे पारितोषिक मिळविले. तर तिसरा क्रमांक (टी. वसंतदास पाटील शाळा) यांना तृतीय क्रमांकाचे बक्षीय मिळाले. जवळी पाटील यांनी या स्पर्धेचे पंतप्रधान केले.

परांजने म्हणाले, 'विद्यार्थ्यांनी उत्तमरी प्राचीन कला शिक्षणावर भर द्यावा आणि लक्षात आणायी सगळ्यांची रीती विकसित करावी. यामुळे नवीन-नवीन कलाकृती साकारण्यास मदत होईल. मोठी सवने पाहिले आणि ती प्रत्यक्षात उतरविल्यासाठी प्रयत्न करावेत.' 'विज्ञान व कला यावर आधारित असलेली ही चित्रकला स्पर्धा महाराष्ट्राच्या शाळांमध्ये पारितोषिकाचे आर्थिक करणारा अशाचबरोबर खोरासुर यांनी सांगितले.

SAKAL TIMES – 20 July 2016

Scientists hold talk on art and science of colours

The goal was to promote correlation of science and arts

ST CORRESPONDENT
reporters@sakaaltimes.com

Pune: A volunteer group of scientists from CSIR-NCL and IISER-Pune called Exciting Science Group (ESG) organised a 'Science talk on 'The Art and Science of Colour' for students of private schools followed by science and art competition on Saturday at Venture Centre.

The goal of this combined event was to motivate students to understand the correlation between science and art which will also boost their imagination.

The topics included in the competition were the world without technology, Indian agriculture in

2050 and a life on another planet. More than 150 students from various schools across the city attended the competition to merge science with art.

BOOSTING IMAGINATION

Saya Sengupta, a scientist from CSIR-NCL, addressed the students on the topic 'The art and science of colours'. He briefed the students that history of colours and how colours are formed through various reactions.

Shivprasad Patil, associate professor at IISER, was the Chief Guest for the event whereas artist

Jayanti Patil judged the competition.

This competition was conducted in two groups, first for for class 7 and class 8 and the second group for class 9 and class 10.

Gayatri Kshirsagar, associate from ESG, said that the students often think that science and art are different things.

"We are merging science with art, we are trying to make the students realise that science is present everywhere. Hence, having an scientific attitude is necessary and hence, this exercise helps the children understand the science involved in every day life," added Kshirsagar.

TIMES OF INDIA – 12 OCT 2016

Oct 12 2016 : The Times of India (Pune)

Dad's death becomes defining moment for Pashan youth

Ardhra.Nair@timesgroup.com

He had passed standard X, when his father was diagnosed with cancer and his mother, who worked as a maid, was finding it hard to make both ends meet.

Shekhar Jadhav (19) had fleetingly thought of quitting studies to work. But a sympathetic mentor and a few good students gave their time to teach him and Jadhav is now a third-year student of biology at the Indian Institute of Science Education and Research (IISER) aspiring to carry out research in cancer.

Jadhav is an inspiration to students from his neighbour-

hood in Nimhan Mala, an impoverished neighbourhood in Pashan area. After scoring 93% in standard X from a municipal school, Shekhar was thinking of dropping out of school.

"We had an Exciting Science group where people, especially from National Chemical Laboratory, teach students about basic science. One of them was Guruswamy who noticed my interest in science and would tell me about various competitive exams like the JEE. But I never wanted to go to IIT as pure science fascinated me," Shekhar said.

This led his mentor to

Spreading knowledge

Shekhar is now a member of Disha. After experiencing how a few good and determined minds can change a person's future, Shekhar has decided to do what they did for him. "This year, my friends and I have decided to teach three girls from my own school who did well in their standard X and XI. I will be teaching them physics, chemistry, biology and mathematics. I can't ever thank enough all those who helped me get here. I know how hard it is for a child in a PMC school to achieve something. Teaching needy children is the best way to give back," he added.

talk to members of Disha, a student outreach programme by students of IISER, Pune. While Disha was into teaching students in the slums, there was no specialized train-

ing. "Some students started teaching me physics, chemistry, biology and mathematics. I am the only student who has ever been taught in such a special manner,"

Shekhar said. But the stress at home due to his father's illness, a change in the teaching pattern in schools and junior colleges, and the intermediate training by IISER students led to Shekhar performing badly in standard XII. "I could just make the cut off to apply to IISER. I knew it was a do-or-die situation for me," he said.

Shekhar plunged into studies. "Somebody told me the results would be declared the same day. I don't have an internet connection at home so I kept calling people every hour. I called a Disha coordinator at 3am to ask about the results," he added.

That year, the results were announced five days later. Shekhar said they were the worst five days. "On the sixth day, the result was announced and I was in. Nobody from our locality knows what IISER is. To them, it is a cluster of intimidating buildings on the left while going to the university from Pashan," he said.

His parents paid his fees through loans from friends, and the second and third year fees were paid by Shekhar himself. "I get Rs 5,000 as stipend every month which I saved. I want to do research in cancer, hence I chose biology," he added.

Special talk on science and technology of currency manufacturing

TNN | Nov 25, 2016, 06.48 PM IST

PUNE: The Exciting Science Group (ESG) has announced a special talk on science and technology of currency manufacturing as part of the Popular Science Talks series on December 11 at 10 am at the Venture Center, NCL Innovation Park, Pashan. This talk will focus on the manufacturing and security features. A statement issued by ESG said that, the currency manufacturing and related technologies combine principles of chemical and materials sciences and engineering in very interesting ways to ensure a durable product that is difficult to counterfeit.

Students will learn about both paper and plastic currency notes and their manufacturing processes. They will also learn about the printing process, inks and security features like colour changing inks, fluorescent fibers, threads and many others. The statement further added, currency notes are on constantly on everyone's mind due to the demonetization exercise, but how exactly are currency notes made and what is the technology that goes into making notes? A group of scientists from the CSIR-National Chemical Laboratory have been advising and collaborating with the Reserve Bank of India for several years.

The ESG, Venture Center, a volunteer group of scientists from CSIR-NCL and IISER-Pune organizes regular programmes to bring the joy and excitement of scientific research to school students. One such programme is the Popular Science Talks which are organized to allow school students to interact with eminent practising researchers. Pre-registration is necessary for all the events, details of which can be obtained from the ESG website : www.excitingscience.org.

Exciting Science Group organizes inter-school science quiz competition in January

TNN | Dec 1, 2016, 03.45 PM IST

PUNE: The Exciting Science Group (<http://www.excitingscience.org/>) will be organising 'Kutuhul 2017' - an inter-school Science quiz competition - on January 7, 2017 at IISER-Pune. This competition will be open to students of class 8 and class 9 in two phases - preliminary round and final Round. It will provide an unique and exciting platform for school students to showcase their thinking skills in scientific concepts. While there is no entry fee for this competition, registration details can be had from the ESG website. The last date for registration is December 26.

Also, ESG has been organizing popular science talks at Venture Center to allow school students to interact with eminent practicing researchers. ESG will conduct the next popular talk on "Science and Technology of Currency Manufacturing" on December 11, and "Surface Tension and Wetting" on December 18. Pre-registration is necessary for both the talks.

All ESG programmes are run free of cost to the students. ESG activities are supported by Forbes Marshall Foundation, Persistent Foundation, Praj Foundation and Nag Foundation.

SAKAL TIMES - DEC 2016

ESG to hold Kutuhal 2017 on Jan 7

ST CORRESPONDENT
reporters@sakaaltimes.com

Pune: The Exciting Science Group (ESG) will organise 'Kutuhal 2017', an Inter-School Science Quiz Competition at Indian Institute of Science, Education and Research, (IISER) here on January 7 next year.

This competition is open to students of Std VIII and IX and will be held in two phases

- preliminary and final rounds. This competition will provide a platform for school students to showcase their thinking skills in scientific concepts.

SCIENCE QUIZ

The last date for registration is December 26 and there is no entry fee for the competition. For guidelines and registration

details, visit <http://www.excitingscience.org>.

The Exciting Science Group, Venture Centre is a programme initiated by a volunteer group of scientists from CSIR-NCL and IISER-Pune. This initiative is aimed at conveying the excitement of science and technology to school students.

ESG will conduct its next popular talk on 'Science and Technology of Currency Manu-

facturing' on December 11 and 'Surface Tension and Wetting' on December 18. Pre-registration is necessary for both the talks. Details can be obtained from the ESG website <http://www.excitingscience.org/>.

ESG activities are supported by generous donations from the Forbes Marshall Foundation, the Persistent Foundation, the Praj Foundation and the Nag Foundation.

INDIAN EXPRESS - 6 JAN 2017

Inter-school science competition on Jan 7

Pune: A science group will conduct Kutuhal 2017 - an inter-school Science quiz competition - on Saturday, January 7 at the Indian Institute of Science Education and Research IISER.

This competition will be open to students of classes 8 and 9 in two phases - preliminary round and final round. This competition will provide a unique platform for students to showcase their thinking skills in scientific concepts. A total of 136 teams from 24 schools, including 3 PMC

Vidyaniketans will be participating in the competition.

A special talk titled "A Short Talk on Long Molecules" by Professor Julia Kornfield, Professor of Chemical Engineering, CalTech, USA will be held after the preliminary round. Julia Kornfield studies polymer properties and develops a molecular understanding of them. Her group works on materials that find a wide variety of uses: from treatments for eye disease to preventing aeroplane explosions. **ENS**

The Exciting Science Group in Pune is a similar initiative. Run by scientists from the National Chemical Laboratory (NCL) and faculty from the Indian Institute of Science Education and Research (IISER), Pune, it focuses on school-kids between classes 8 and 10. Dr. Guruswamy Kumaraswamy, who heads its coordination team and also teaches at NCL, says, "We send our Ph.D. students from NCL and IISER to municipal schools to run science clubs there and hold workshops. The kids there then come up with independent projects and compete with the best schools in the city in science fairs. It is very important and only fair that they get this exposure before they choose their streams."
