

About our Speaker

Name: Anand Krishnan

Where does s(he) work: IISER Pune

What does s(he) do: DST-INSPIRE Faculty Fellow. I study bird signals and behavior, including sound and color patterns

Where and what did s(he) study: Ph.D, National Centre for Biological Sciences, TIFR, Bangalore (2014). Post-doctoral research, Johns Hopkins University, 2014-2016.

What are your interests (in your job, and outside):

I have worked on many creatures, big and small, studying navigation and sensory signals. I am also tremendously fascinated by beaks, skulls and teeth (when they're not biting me, that is!). Lastly, I am interested in solving long-standing mysteries of why so many flying animals seem to keep hitting my head...a problem for another day!

About our Speaker

Name: Rohit Chakravarty

Where does s(he) work: IISER Pune

What does s(he) do: Project Assistant

I have an annual working vacation of three months in the Himalayas where I catch bats and record their ultrasonic calls. I spend the rest of the year making sense of my bats, while losing sense myself!

Where and what did s(he) study:

MSc. Wildlife Biology & Conservation, National Centre for Biological Sciences, Bangalore

What are your interests (in your job, and outside):

- Watching birds during the day and catching and hearing bats at night
- Hiking
