

# About our Speaker

**Name:** Dr. Arun G. Banpurkar  
Department of Physics,  
Savitribai Phule Pune University, Pune- 411 007.

I am assistant professor and works on Soft Materials and their properties including liquids, liquid flows, spreading on non-stick surfaces etc.

**Education:** Doctorate from S P Pune University  
Post doctoral research at Physics of Complex fluids,  
University of Twente, Enschede The Netherlands.

My research deals with Soft Materials which deform/flows at room temperature with nominal external force; for instance liquids, gels, oils etc and spreading of liquids on non-sticky surfaces.

Outside work: Interest in popularization of science. Teaching science, particularly physics of the liquids in everyday life..
