

About our Speaker

Name: Nitin Gupta

Where does s(he) work: NavStik Labs

What does s(he) do: Nitin is the Founder and CEO of NavStik Labs. He works with his team to build the “brains” (electronics and algorithms/software) for the drones.

Where and what did s(he) study:

B.Tech, Aerospace Engineering, IIT Bombay

MS, Aerospace Engineering, University of Maryland, USA

What are your interests (in your job, and outside):

Nitin likes to work in the intersection of computers/algorithms, electronics and mechanical systems. The idea of interfacing electronics and software with mechanical systems, to control and automate them, excites him. Aerospace, Mechatronics, Control Systems and Artificial Intelligence are areas that interest him.
