

About our Speaker

Name: Dr. Sagar Pandit

Where does he work: IISER Pune

Max Planck Institute for Chemical Ecology

What does he do: Assistant Professor in Biology

Research: How plants and insects interact with each other using chemicals

Where and what did he study:

MSc: University of Pune (Department of Botany)

PhD: National Chemical Laboratory, Pune (Topic: Genetic analysis of Alphonso mango flavour biogenesis)

Post-doctoral research: Max Planck Institute for Chemical Ecology, Jena, Germany

What are your interests (in your job, and outside):

- Studying plants and insects
- Studying gene functions in nature
- Excursions in mountains and forests
